

SULIMAN N. AL-TURKMANI

Network Engineer | CCNA • HCIP • Fortinet FCF

Riyadh, Saudi Arabia • +966 53 762 7710 • suliman.alturkmani@gmail.com • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Network & IT Engineer with 14+ years in Saudi government and private sectors. Operated a multi-vendor enterprise network across HQ, 15 branches, and a datacenter serving 500+ users; now sole owner of end-to-end IT for a 25-user company. Focused on network security, high availability, and enterprise routing & switching.

TECHNICAL SKILLS

Networking: Cisco (ASR, Nexus, Catalyst), Alcatel-Lucent OmniSwitch, Juniper SRX, Aruba, HPE, Dell; OSPF, EIGRP, BGP, MPLS; VLAN, STP, 802.1Q, EtherChannel (LACP/PAGP); HSRP, VRRP, GLBP, VSS; NAT, PAT, ACLs; LAN, WAN, SD-WAN, VPN (IPSec, GRE); IPv4/IPv6, subnetting; high availability; multi-vendor device configuration via CLI (Cisco IOS/NX-OS, Alcatel-Lucent AOS, FortiOS) and vendor web portals/management platforms

Security: FortiGate firewalls, Cisco ASA, firewall policy configuration, VPN, network device hardening, endpoint protection

Systems: Windows Server, Active Directory, DNS, DHCP, Group Policy, Hyper-V, VMware, Microsoft 365 (Exchange Online, Teams, SharePoint, OneDrive), Linux, backup & disaster recovery

Voice & Wireless: 3CX PBX, SIP trunking, VoIP, Cisco IP Telephony, Cisco wireless (WLC, Prime, WCS)

Monitoring & Troubleshooting: SolarWinds, PRTG, LibreNMS, SNMP; Wireshark packet capture & protocol analysis; vendor platform portals (Cisco Prime/WCS, FortiGate/FortiCloud, Microsoft 365 & Azure admin centers)

Scripting & Automation: PowerShell (Active Directory, Microsoft 365 and Windows Server administration), Python, Bash / Linux shell, SQL (working knowledge)

Documentation & Process: Microsoft Visio network topology, rack and as-built diagrams; design-diagram interpretation; asset registers and runbooks; ITIL-aligned incident, change, problem and SLA management; ticketing (Interaction Smart Client)

Platforms: Zoho One admin (Mail, CRM, Projects), WordPress admin

PROFESSIONAL EXPERIENCE

Lead IT Engineer (Network & Systems) — MEGA Group, Riyadh

Sep 2024 – Present

Sole IT engineer — full ownership of network, systems, security, and end-user infrastructure for a 25-user company.

- Kept business operations running with zero external IT support by single-handedly managing the full stack: 3 switches, edge router, FortiGate 60F firewall, 2 physical servers, and all endpoints.
- Consolidated internal services onto a single Hyper-V host by designing the virtualization platform and provisioning multiple production VMs.
- Improved operational response time and reduced repeat issues by producing internal IT documentation — Visio network topology and rack diagrams, an asset register, and end-user training.
- Administer Microsoft 365 (Exchange Online, Teams, OneDrive, SharePoint) for all on-site and remote staff; manage backups, patching, antivirus, and vendor relationships.

12 years of continuous service with the Ministry of Media on long-term contract assignments (Tech Track, Creative System, SNS, ACS).

IT Network Engineer — Ministry of Media, Riyadh

Jan 2021 – Aug 2024

- Sustained enterprise network availability for HQ, 15 branches, a main datacenter, and ~500 users by operating a multi-vendor estate of Cisco ASR, Nexus, and Catalyst platforms plus Alcatel-Lucent OmniSwitch, Juniper SRX, Fortinet FortiGate, HPE, and Dell switching.
- Secured branch and datacenter traffic by configuring firewall policies, proxy, NAT/PAT, and ACLs, and by maintaining routing across OSPF, EIGRP, BGP, and MPLS over WAN, SD-WAN, and IPSec VPN links.
- Resolved fault and request tickets within agreed SLAs via Interaction Smart Client, working to ITIL-aligned incident and change management practice — including network backups, password recovery, and IOS upgrades.
- Maintained core identity and IP services (Active Directory, DHCP, DNS) and supported VoIP/SIP services across all sites.
- Detected and prevented outages proactively by monitoring the estate with SolarWinds, PRTG, and LibreNMS.
- Resolved connectivity incidents down to the physical layer by testing and certifying structured copper and fibre cabling with cable testers and troubleshooting Wi-Fi coverage and channel-planning issues across sites.

Network Engineer — Ministry of Media, Riyadh

Jan 2018 – Dec 2020

- Eliminated single points of failure in the core by implementing HSRP, VRRP, and GLBP redundancy and VSS between Catalyst core switches.
- Delivered the Riyadh Book Fair 2019 network end-to-end, earning the Ministry of Media CIO Award.
- Standardized L2/L3 architecture across HQ and 15 branches by configuring VLANs, VTP, trunking, port-channels, and SNMP management.
- Isolated intermittent connectivity, latency, and application-reachability faults by capturing and analyzing traffic in Wireshark alongside vendor management portals, pinpointing the responsible layer before escalation.
- Documented HQ and branch topology, VLAN/IP allocation, and rack layouts in Microsoft Visio, and interpreted vendor design diagrams during upgrades to keep as-built references accurate.
- Enabled unified IP telephony, Wi-Fi, and clock synchronization by building segmented DHCP scopes per service.
- Managed Cisco access points and wireless controllers via WCS and Cisco Prime; maintained IOS/firmware upgrades and configuration backups.
- Improved wireless reliability by troubleshooting Wi-Fi coverage gaps and interference and applying channel-planning fundamentals across Cisco access points at HQ and branches.

IT Network Specialist — Ministry of Media, Riyadh

Jan 2015 – Dec 2017

- Expanded network coverage across HQ and branches by installing and configuring network hardware, software, and security measures, and by planning and executing upgrades with full documentation and performance reporting.
- Reduced recurring connectivity issues through preventive maintenance, root-cause analysis, and certification of structured copper and fibre-optic cabling with cable testers.

Technical Support Engineer — Ministry of Culture & Information, Riyadh

Jan 2012 – Dec 2014 (via ACS)

- Owned end-to-end diagnosis, resolution, and follow-up for a ~500-user environment — managing concurrent tickets within agreed time limits, escalating appropriately, and repairing hardware and software faults across PCs, printers, servers, and peripherals.

KEY PROJECTS

- **Website Hosting Migration, Azure → Hostinger — MEGA Group (2026):** Completed migration with zero data loss and minimal downtime by reconfiguring DNS and SSL, validating integrations, and tuning post-migration performance.
- **Odoo → Zoho One Business Migration — MEGA Group (2025):** Moved company-wide operations (CRM, projects, email) to Zoho One with minimal downtime by planning data migration, configuring applications, and executing the cutover.
- **In-House VoIP PBX (3CX) — MEGA Group (2024–2025):** Replaced external telephony dependence by deploying a virtualized 3CX PBX on Hyper-V with SIP trunking, call routing, and a digital receptionist, and rolling out 20+ IP phones.
- **SolarWinds Network Monitoring Deployment — Ministry of Media (2021):** Gained centralized visibility into device health, bandwidth, and uptime across the entire network by onboarding switches, routers, firewalls, and servers into SolarWinds via SNMP with dashboards and alerting.
- **Network & Security Infrastructure Upgrade — Ministry of Media (2019):** Strengthened perimeter security by upgrading the security rack to FortiGate firewalls with Trend Micro traffic analytics — co-designed with the Security department and managed through post-upgrade monitoring.

EDUCATION

BSc Computer Science — University of the People (2024) • GPA 4.0, Graduated with Honors

Bachelor of IT Engineering — Damascus University (2015)

CERTIFICATIONS & TRAINING

Certifications: Cisco CCNA (Routing & Switching) • Huawei HCIP • Fortinet Certified Fundamentals in Cybersecurity (FCF) • CompTIA A+

Training: Google IT Support Certificate • Cisco Cybersecurity Essentials • CCNP ENCOR (in progress) • Fortinet NSE4 (in progress) • ACA

AWARDS & LANGUAGES

Ministry of Media CIO Award — successful delivery of the Riyadh Book Fair 2019 network

Languages: Arabic (native) • English (fluent, professional working proficiency)
